

Meta Standard Guide

limited member

If it is your first time using the meta standard, we will assume you have no registered certificates in the platform.

You have to register you certificates in your account in order to make the meta standard available.

When having no certificates you will see the message at the top of the form which you can click on to start register your certificates, also the green button on the top-right is there for quick use.

You have no registered certificates, [register certificates now](#)

GSES Meta Standard

Register Certificates

Upload your certificates and get points on your rating card based on already achieved results.

Follow the next steps:

1. Register your Certificate
2. Select certificates for your validity check
3. Request validity check
4. After the validity check the points and certificates will appear on the rating card

Select the standards and/or certificates you want to verify.

Only the registered certificates will be available for selection.

1. The Process

2. Optimize your Rating

3. Verification Pricing

4. Extensive Explanation

5. Certificates & Ecolabels

The verifications are done by independent external parties, for more information and prices please contact us.

Once you have clicked on 'Register certificate' button or in the message, you will be directed to this form.

Here you will register your achieved certificates, so you can use these certificates in the meta standard.

The organization is pre-selected, next you have the certificate and extra details about the audit with the option to upload proof right away. The proof will be used to check the validity of your certificate.

If everything has been filled in, you can click on 'Add Certificate to your Dashboard'.

Add Certificate

Be precise, this information can only be entered once because it does not vary and is based on facts. Make sure you have all files and information gathered and aligned.

Add Certificate to your Dashboard

Congrats, your first certificate registered in the GSES System!

Now the meta standard unfolds and you will be able to use it and get verified.

If you have registered your certificate successfully it will appear in the meta standard as available.

You can simply check the certificates you have registered and want to use in the meta standard for requesting verification.
